Skills:

JavaScript, Express, PostgresSQL, React, HTML5, CSS3, Node.js, Git, Adobe Photoshop

....

Projects:

Furever Home
A Full Stack application that simplifies the pet adoption process for interested pet owners
- ❖ Utilized the Axios module to make calls to an API endpoint
- ❖ Constructed backend with Express to create a custom RESTful API that seamlessly integrates with PetFinder's API
- ❖ Implemented React and React Context API to manage applications state

EarCandy
A front-end application that allows users to post a list of songs to be critiqued by others
- ❖ Utilized the Axios module to make calls to a RESTful API created with express
- ❖ Designed with CSS3 to create a clean and smooth user experience

Hidden Objects
A point and click puzzle react application
- ❖ Implemented with React. Creating a welcoming experience with each level with the use of react sound
- ❖ Designed with CSS3. Allowing the precise placement of event handlers with the help of the CSS grid framework

....

Experience:

Uber/ Lyft   *Queens, New York*
Driver   *September 2016- Present*
